The account has queue containers with logging enabled. You need to view all log files generated during the month of July 2014. Which URL should you use to access the list? A.

[http://contosostorage.queue.core.windows.net/\\$logs?restype=container&comp=list&prefix=queue/2014/07B](http://contosostorage.queue.core.windows.net/$logs?restype=container&comp=list&prefix=queue/2014/07B).

[http://contosostorage.queue.core.windows.net/\\$files?restype=container&comp=list&prefix=queue/2014/07C](http://contosostorage.queue.core.windows.net/$files?restype=container&comp=list&prefix=queue/2014/07C).

[http://contosostorage.blob.core.windows.net/\\$files?restype=container&comp=list&prefix=queue/2014/07D](http://contosostorage.blob.core.windows.net/$files?restype=container&comp=list&prefix=queue/2014/07D).

[http://contosostorage.blob.core.windows.net/\\$logs?restype=container&comp=list&prefix=queue/2014/07](http://contosostorage.blob.core.windows.net/$logs?restype=container&comp=list&prefix=queue/2014/07) Answer: D Explanation: All logs are stored in block blobs in a container named \$logs, which is automatically created when Storage Analytics is enabled for a storage account. The \$logs container is located in the blob namespace of the storage account, for example: [http://<accountname>.blob.core.windows.net/\\$logs](http://<accountname>.blob.core.windows.net/$logs). This container cannot be deleted once Storage Analytics has been enabled, though its contents can be deleted. Note: Each log will be written in the following format: <service-name>/YYYY/MM/DD/hhmm<counter>.log

<http://msdn.microsoft.com/library/azure/hh343262.aspx> QUESTION 143 Hotspot Question You have an on-premises data center and an Azure subscription. The Azure subscription has services that are hosted in the East US region. You have servers that run Windows Server 2012 R2. The servers are located on-premises and in both Azure regions. You plan to deploy Microsoft System Center 2012 R2 Data Protection Manager (DPM) to protect all of the servers. The DPM deployment has the following requirements: - Centralize the management of all backups. - Minimize the costs associated with bandwidth usage - Protect Microsoft SharePoint and Microsoft SQL Server workloads for up to nine years You need to recommend which components must be configured to support the planned deployment. What should you include in the recommendation? To answer, select the appropriate options in the answer area.

ANSWER AREA Number of DPM servers: 0-3? Number of Azure backup vaults: 0-2? Answer: Number of DPM servers: 1 Number of Azure backup vaults: 2 QUESTION 144 Hotspot Question You have an Azure subscription. You need to recommend a solution to automate the configuration of virtual machine to meet the following requirements: - Manage 30 virtual machines that run Linux by using Chef. - Ensure that 10 virtual machines that run Windows Server 2012 R2 are turned off outside of business hours. What should you include in the recommendation? To answer, select the appropriate options in the answer area. Answer: QUESTION 145

You work for a company named Contoso, Ltd. The network contains an on-premises Active Directory domain that has Active Directory Federation Services (AD FS). Contoso uses an internally developed claims ... App1. You implement directory synchronization with Azure Active Directory (Azure AD). You need to recommend which configuration should be performed to... Single-Sign-On to App1 to... authenticated by Azure AD. Which two configuration should you include in the recommendation? ..A.

Azure AD as claims provided trust B. App1 as a claims provide C. Azure AD as relying party trust D. App1 as relying party trust Answer: BC QUESTION 146 Hotspot Question Your company plans to migrate its on-premises Microsoft SQL Server databases to Azure. You are considering using SQL Server 2014 on Azure virtual machines and Azure SQL Database. The planned migration must support the following data security features: - Database-level firewall rules - Dynamic Data Masking - Transparent data encryption (TDE) You need to identify the data security features supported by each product. Answer: QUESTION 147 You need to recommend the appropriate strategy for the data mining application. What should you recommend? A. Configure multiple on-premises cluster that runs multiple Azure virtual machines to connect by using an Azure virtual private network (VPN) B.

Configure an on-premises cluster that runs multiple Azure virtual machines that is located in the central office. C. Configure a cluster of high-performance computing virtual machines (VMs) that use the largest number of cores. Ensure that the VMs are instantiated in different Azure datacenters that are distributed across the same affinity group. D. Configure a cluster of high-performance computing virtual machines (VMs) that use the largest number of cores. Ensure that the VMs are instantiated in the same Azure datacenter. Answer: B QUESTION 148 Hotspot Question Your company has a branch office that has 90 employees. The computers at the branch office are configured as shown in the following table. You need to identify a backup method for the computers. The solution must use Azure Backup whenever possible. What should you identify? To answer, select the appropriate options in the answer area. ANSWER AREA 64-bit version of Windows 7 SP1: ? (Azure Backup? Wbadmin?) 32-bit version of Windows 8.1: ? (Azure Backup? Wbadmin?) 64-bit version of Windows 8.1: ? (Azure Backup? Wbadmin?) 64-bit version of Windows Server 2012 R2: ? (Azure Backup? Wbadmin?) Answer: 64-bit version of Windows 7 SP1: Azure Backup 32-bit version of Windows 8.1: Wbadmin 64-bit version of Windows 8.1: Azure Backup 64-bit version of Windows Server 2012 R2: Azure Backup

Explanation: Azure support Azure Backup for 64 bit client since Win 7 SP1. Number of computers is important (max 25 for the one machine per backup vault scenario and max 50 computers for the multiple machines to the same vault)

You need to encrypt a media file. Which type of encryption should you use? A. Secure token service B. PlayReady C. Storage D. Envelope

Answer: B
QUESTION 150 Drag and Drop Question You need to architect a solution for the client's core business objectives. Which services should you recommend? To answer, drag the appropriate service to the correct business objective. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer: Explanation: <https://docs.microsoft.com/en-us/azure/application-insights/app-insights-overview>QUESTION 151

You need to select the appropriate solution for monitoring the .NET application. What should you recommend? A. Microsoft Analytics Platform B. Application Insights C. Visual Studio IntelliTrace D. Data Factory

Answer: B
QUESTION 152 You design an Azure web application. The web application is accessible by default as a standard cloudapp.net URL. You need to recommend DNS

resource record types that allow you to configure access to the web application by using a custom domain name. Which two DNS

record types should you recommend? A. CNAME B. AC. SRVD. MX

Answer: AB!!!RECOMMEND!!!1.[2018 New 70-535
